

Mocca Master

- "assisted" pour over
- repairable
- classic

issues:

- brew basket doesn't have even coverage
 - stir/workhouse approach
- Temp affects brew time
-

Harris Teeter Ethiopian

Description: a budget roast for every day bulk brewing. Warm flavor profile with notes of chocolate and some stone fruit like cherry and a hint of vanilla and port. Difficult to hit perfect but very easy to hit ok.

goal: find brew condition for automatic brewer
for "daily grind."

for:

~ 600 - 700 mL brewed

coffee: 40 g ground day of @ 7.9 w/riete

water: 840 mL @ ~75°F

Moccamaster: slow (1/2 caraff) + work horse
method

scale to full pot?

Ethiopian
light

trial 1

~ ~~60~~ Groups water by mass

- " coffee absorbs at roughly 2x its mass

60 g coffee $\approx$ 120g water extra

$$\frac{1.2}{2} \times 2 = 2.2 \times$$

bt grind & water

37.5g off $\rightarrow$

~ 700 + (80 mL - 100 mL) ^{grinding} water
brew

@ slow

then move to grind size

Vol adjusted to 860 - 880 mL
yield ~ 700

grind @ 8.5 - 8
mix @ half basket

Fast forward

Counter culture

note starting w/ an OLI roasted on date

- 7.5 (smallish grind size)
- 890 mL to 38 g coffee
- 2/3 basket

a little chalky. Old roasted on date means only natty profile survives. Need to try with something more fresh.
